HSS JOBBERS LENGTH DRILLS

118° POINT

DWDN Series - Surface Treated Economy

D/AN Series - Surface Treated Premium Quality

A dependable, general purpose drill designed to perform in a broad range of materials in the iron and steel families. Ideal for production, maintenance or portable drilling jobs. Surface treated with abrasion-resistant black oxide.

DWDP Series - Polished Economy

D/AP Series - Polished Premium Quality

A dependable, general purpose drill used for a variety of materials. Ideal for production, maintenance or portable drilling jobs. Bright finish, which provides superior chip evacuation.

HSS JOBBERS LENGTH DRILLS

135° SPLIT POINT

DWDSP Series - Economy

D/ASP Series - Premium Quality

Manufactured to National Aerospace Standard 907, these drills are ideal for portable or machine drilling of low tensile strength alloy materials. They have a black oxide surface treatment that is abrasion resistant, reduces chip welding and improves chip flow. The 135° split point is self-centering and reduces thrust.

KFD Series - Premium Quality

Manufactured from premium grade high speed steel, Killer Force Drills have a heavy duty 135° split point for self-centering and reducing thrust. Black and Gold surface treated for use in stainless steel and other hard metal drilling.

KFD3F - Contractor Grade

Manufactured from M1 High Speed Steel for use in a wide range of materials such as aluminum, iron and steel. They are gold and black surface treated with a 3-flat shank for extra secure hold in your chuck. Split point tip for self-centering and reducing thrust.

*Sizes smaller than 3/16" have a round shank.

COBALT JOBBERS LENGTH DRILLS

135° SPLIT POINT

DWDCO Series - m35 Cobalt

D/ACO Series - m42 Cobalt

Manufactured to National Aerospace standard 907. Made of heat resistant cobalt, they display higher red hardness which permits speeds upto 30% greater than high speed steel drills and are especially effective in drilling tough, high tensile strength materials like PH stainless steel, inconel, and titanium. The 135° split point is self-centering and reduces thrust. Sizes smaller than 1/16" have the 118° standard point.

STEPPED POINT COBALT DRILL BITS

GSC Series - Gold Stepped Point Cobalt Drill Bits

Stepped Point Cobalt Drill Bits start easier, drill faster, increase lifespan and reduce heat compared to standard drill bits. They can be used to enlarge existing holes or to create new, smoother holes in a wide range of materials such as acrylics, steel, metal, brass and other hard metals. These drills have a 135 degree split point tip and a 3 -flat shank to prevent spinning. *Sizes 11/64" and smaller have a round shank. 29 Piece Set comes in a round plastic case.

QUICK CHANGE HEX SHANK DRILL BITS

KFDHEX Series - HSS Quick Change Hex Shank Drill Bits

Manufactured from premium grade high speed steel, Killer Force Drills have a heavy duty 135° split point for self-centering and reducing thrust. Black and Gold surface treated for use in stainless steel and other hard metal drilling. 1/4" hex shank can be used in quick change impact drivers.

COHEX Series - Cobalt Quick Change Hex Shank Drill Bits

Manufactured to National Aerospace standard 907. Made of heat resistant cobalt, they display higher red hardness which permits speeds upto 30% greater than high speed steel drills and are especially effective in drilling tough, high tensile strength materials like PH stainless steel, inconel, and titanium. The 135° split point is self-centering and reduces thrust. Sizes smaller than 1/16" have the 118° standard point. 1/4" hex shank can be used in quick change impact drivers.

HSS METRIC JOBBERS DRILLS

118° POINT

DWDMM Series - Metric

A dependable, general purpose drill designed to perform in a broad range of materials in the iron and steel families. Ideal for production, maintenance or portable drilling jobs. Surface treated with abrasion-resistant black oxide.

COBALT METRIC JOBBERS DRILLS

135° SPLIT POINT

D/AMMCO Series - Metric Cobalt

Manufactured to National Aerospace standard 907. Made of heat resistant cobalt, they display higher red hardness which permits speeds upto 30% greater than high speed steel drills and are especially effective in drilling tough, high tensile strength materials like PH stainless steel, inconel, and titanium. The 135° split point is self-centering and reduces thrust. Sizes smaller than 2mm have the 118° standard point.

HSS TIN-COATED JOBBER DRILLS

118° POINT

DWDTN Series - TIN Coated

Superhard titanium nitride surface treatment improves drill life, chip ejection, and productivity; decreases horsepower requirements. Ideal for hard metals, work hardened stainless and other difficult to drill materials.

HSS LEFT HAND JOBBER DRILLS

118° POINT

DWDLH Series - Left Hand

General purpose drill construction. Features a left hand helix for applications where spindles rotate counterclockwise. Left hand drills can also be used to drill out broken bolts.

HSS DRILL BLANK

DWDBL Series - Blanks

Bright finish, Hardened and ground, blanks are often used as gauges to check hole size and drill bushing size. Can often be used as guide pins for die sets or modified as punches.

SCREW MACHINE LENGTH DRILLS

135° SPLIT POINT

DWDST Series - High Speed Economy

D/AST Series - High Speed Premium Quality

Manufactured to National Aerospace Standard 907. 135° split point is self-centering and reduces thrust. Ideal for portable or machine drilling. Short, rugged construction performs well in a broad range of materials in the iron and steel families. Screw machine drills are popular in the automotive and construction industries. They are often used in screw machine setup where spindle clearance is limited. Sizes smaller than 1/16" or #52, and larger than 1/2" have the 118° standard point.

KFDST Series - Black & Gold HSS Contractor Grade

Contractor grade drills are manufactured from M1 High Speed Steel for use in a wide range of materials such as aluminum, iron and steel. Screw machine drills are popular in the automotive and construction industries. They are often used in screw machine setup where spindle clearance is limited. The 135° split point is self-centering and reduces thrust.

D/ASTCO Series - Cobalt Premium Quality

Manufactured to National Aerospace Standard 907. 135° split point is self-centering and reduces thrust. Ideal for portable or machine drilling. Short, rugged construction performs well in high tensile strength materials like PH stainless steel, inconel, and titanium. The 135° split point is self-centering and reduces thrust. Sizes smaller than 1/16" have the 118° standard point.

KFD MECHANICS LENGTH DRILLS

135° SPLIT POINT

KFDML Series - KFD Mechanics Length

Manufactured from premium grade high speed steel, Killer Force Drills have a heavy duty 135° split point for self-centering and reducing thrust. Gold and black surface treated for use in stainless steel and other hard metal drilling. *Sizes 1/16" - 11/64" have a round shank.

HSS DOUBLE END DRILLS

135° SPLIT POINT

DWDDE - Economy

D/ADE - Premium Quality

Used for drilling truck and auto bodies, or any thin sheet metal. Popular for pop rivet drilling applications. 135° self-centering split point aids in penetration.

SOLID CARBIDE DRILLS

118° POINT

DMOD Series - Solid Carbide Drills

Solid carbide drills are designed for drilling abrasive materials when drilling accuracy must be maintained and/or when used in high temperature drilling applications. Solid Carbide drills are used on materials such as cast iron, the non-ferrous alloys, high silicon aluminum, copper, plastics, bronze, hard rubber, plexiglass, and other similar materials.

DIE DRILLS

D/ADIE Series - Carbide Tipped Die Drills

Run at 75 to 100 surface feet per minute with steady hand feed. It is good practice to clear the drill from the hole to allow coolant to wash away the chips. Designed for drilling hardened steels in the range of 45-65 Rc. Note: Sizes under 11/64" are solid carbide spade construction.

CARBIDE TIPPED JOBBER DRILLS

118° POINT

D/ACT Series - Carbide Tipped

Features heavy-duty construction and heat treated body for optimum wear resistance and support of the carbide tip. Used in the production of cast iron, non-ferrous metals, and many composite materials such as hard rubber or copper alloys NOT RECOMMENDED FOR DRILLING STEEL.

COBALT REDUCED SHANK DRILLS

DWDCO Series - Economy

D/ACO Series - Premium Quality

Made of heat resistant cobalt and ground to a heavy duty 135° split point. Common flute and overall length for minimal adjustment during tool changes. Precision ground for high degree of concentricity between shank and body diameter. Ideal for drilling in tough, high tensile strength materials.

6" AIRCRAFT EXT. DRILLS

DWDA/C Series - HSS Economy

D/AA/C Series - HSS Premium Quality

Manufactured to National Aerospace Standard 907. 135° split point is self-centering and reduces thrust. Ideal for drilling in mild steels where extra length for reach is required. They have a black oxide surface treatment that is abrasion resistant, reduces chip welding and improves chip flow. Sizes smaller than #52 and 1/16" have the 118° standard point.

GLBCO Series - Cobalt

Manufactured to National Aerospace Standard 907. Made of heat resistant cobalt, the 135° split point is self-centering and reduces thrust. They are especially effective in drilling tough, high tensile strength materials like stainless steel, inconel and titanium.

CARBIDE TIPPED MASONRY DRILLS

DAM Series - Masonry Drills

Engineered with wide flutes to provide fast dust removal in softer materials. Designed for drilling in brick, concrete and sandstone. Carbide tips brazed to tough steel bodies and are larger than the nominal drill size to provide clearance for installation of anchor screws, expansion shields and toggle bolts. Designed for use in portable electric drills.

*Set includes five sizes: 3/16" x 6", 1/4" x 6", 5/16" x 6", 3/8" x 6" and 1/2" x 6".

SDS DRILLS

SDS Series

SDS Plus shank hammer bits are especially suited for drilling in stone or concrete. Premium SDS Drill Bits are auto-weld manufactured on first-class German and Swiss equipment with a Japanese-manufactured carbide-tip. *Set includes five sizes: 3/16" x 6", 1/4" x 4", 1/4" x 6", 3/8" x 6" and 1/2" x 6".

STEP DRILLS

STE Series - Step Drills

STEHX Series - Step Drills

Step Drills are commonly used on sheet metal and general construction. These black and gold surface treated bits can be used for drilling a wide range of hole sizes in metal, plastic and wood. They have a round shank for use in a wide range of tool holding systems and are packaged individually in hanging clamshell packaging. STEHX Series have a 1/4" quick change hex shank.

				STE Series	STEHX Series

HSS TAPER SHANK DRILLS

DWDTS Series - Taper Shank Drills

Made to fit Morse tapered holders. Designed to perform in a broad range of materials in the iron and steel families. They have a black oxide surface treatment that is abrasion resistant, reduces chip welding and improves chip flow

TAPER SHANK DRILLS

DWDTSCT Series - Carbide Tipped Taper Shank Drills

Features heavy-duty construction and heat treated body for optimum wear resistance and support of the carbide tip. Designed for drilling in cast iron and non-ferrous metals. NOT RECOMMENDED FOR DRILLING STEEL.

TAPER LENGTH DRILLS

DWDTL Series - HSS Taper Length Drills

Designed for general purpose drilling where a length longer than Jobber Length is required. Performs under a variety of normal conditions and in a broad range of materials in the iron and steel families.

DWDTLCO Series - Cobalt Taper Length Drills

Made of heat resistant cobalt. Features 135° heavy-duty construction for drilling in tough alloy steels, forgings, and castings.

DWDTLCT Series - Carbide Tipped Taper Length Drills

Features heavy-duty construction and heat treated body for optimum wear resistance and support of the carbide tip. Particularly advantageous when length longer than Jobber Length is required. Used in production drilling of cast iron, non-ferrous metals, and many composites. Tanged shank allows for use with ASA split sleeve drivers. NOT RECOMMENDED FOR DRILLING STEEL.

HSS EXTRA LONG DRILLS

8" O.A.L. & 12" O.A.L

DWDDL Series - Long Boy Drills

For general purpose drilling in applications where extra length for reach is required, designed to perform in a broad range of materials in the iron and steel families. 118° standard point. Unless otherwise specified, drill bits (including those over 1/2") have a straight shank.

HSS HAND TAPS

T/A Series - High Speed Hand Taps

Hand Taps are the most versatile taps for hand use. They are also appropriate for tapping the vast majority of materials in through or blind holed conditions. **Taper Style** - Starts the thread square with the workpiece. **Plug Style** - Generally used in thru holes. **Bottom Style** - Generates the thread to the bottom of the hole.

HAND TAP AND DRILL SETS IN POUCH

POU Series Hand Tap and Drill Set

Each set comes with one DWT high speed steel tap (plug style) and matching DWDN high speed steel black oxide drill bit in a plastic pouch. Sets with a drill bit over 1/2" come with a DWDRSD reduced shank drill bit with a 1/2" shank.

HSS SPIRAL POINTED TAPS

DWT Series - High Speed Gun Taps

Spiral-Pointed taps, or Machine Taps, were originated to solve the problem of tap breakage in through hole tapping. The Machine Tap shoots chips ahead of the cutting action, thus reducing loading and clogging in the flutes. They are recommended for use in through or blind holes which allow for chip accumulation in the bottom of the hole. Ideal for threading a wide variety of ductile materials, copper and copper alloys, brass and non-metallics.

CARBON STEEL HAND TAPS

DWT Series - Carbon Steel Hand Taps

Carbon Steel Hand Taps are used to re-thread damaged and/or jammed threads. Carbon Steel Hand Taps may also be used to thread mild steels. **Taper Style** - Starts the thread square with the workpiece. **Plug Style** - Generally used in thru holes. **Bottom Style** - Generates the thread to the bottom of the hole.

P U L L E Y T A P S

DWTET Series - High Speed Pulley Taps

Extension Taps are used for tapping the hubs of pulleys for oil caps or set screws. The long shank is also ideal for reaching holes inaccessible with standard length taps. Extension Taps are furnished in several different overall lengths. Available in PLUG chamfer only.

PIPE TAPS

DWT Series - High Speed NPT Taps

T/A Series - High Speed NPT Taps

National Pipe Taper Taps are appropriate for threading a wide variety of materials both ferrous and non-ferrous. The nominal size of a Pipe Tap is that of the pipe fitting to be tapped, not the actual size of the tap. The thread tapers 3/4" of an inch per foot. All Pipe Taps furnished with a 2-1/2" to 3-1/2" thread chamfer. NPT threads require the use of a "sealer" like teflon tape or pipe compound.

INTERRUPTED THREAD

Special Purpose Pipe Tap, appropriate for threading a wide variety of materials both ferrous and non-ferrous where chip disposal is a problem. The first few threads on an Interrupted Thread Pipe Tap are full. The balance of the threads are interrupted to reduce drag while taper pipe threading.

NPS TAPS

National Pipe Straight Taps marked NPS are suitable for tapping holes, or couplings, for low pressure work to assemble with taper threaded pipe or fittings to secure a tight joint when a sealer is used. They are suitable for NPSC and NPSM work.

NPT PIPE TAP SETS

POUNPT Series - NPT Tap and Drill Sets

Each set comes with one DWTPT carbon steel NPT Pipe Tap and corresponding DWDN high speed steel black oxide drill bit in a plastic pouch. Sets with a drill bit larger than 1/2" come with a DWDRSD reduced shank drill bit with a 1/2" shank.

POUCS Series - NPT Tap Sets

Each set comes with DWTPT carbon steel NPT Pipe Taps in a plastic pouch.

DWT Series - NPT Tap and Die Sets in Wood Case

Assortment of NPT Pipe Tap and Die Sets in wood cases.

HEX DIES

DWT Series - Hex Dies

Carbon Steel Hex Dies are for dressing over bruised or rusty threads, they are the most cost effective rethreading tool available. No special holder is required for this type of die, any wrench large enough will suffice. Ideal for maintenance in the shop or field.

ROUND DIES

HSS ROUND STANDARD SIZES

DWT Series - High Speed Adjustable Round Dies

For threading, a High Speed Steel Round Adjustable Die is desired for improved wear life. Round Dies are chamfered on both faces. One side has a 2 to 3 thread chamfer for threading, the other side has a 1" to 1-1/2" thread chamfer for threading close to a shoulder. Adjustment is obtained by a fine pitch screw which forces the sides of the die apart, or allows them to spring together. The slot is beveled so that when the dies are used in a machine holder the adjusting screw can be removed and adjustment made by the adjusting screws in the holder.

DMS Series - 3/16" Depth of Cut

CTH Series - 1" Depth of Cut

Carbide Tipped Hole Cutters provide an easy and efficient way to drill larger diameter holes without requiring large drill bits and extra large chucks.

*3PC SET (7/8", 1-1/8" and 1-3/8") *6PC SET (5/8", 3/4", 7/8", 1", 1-1/4", 1-1/2", 2 Pilot Drills and Allen Keys)

*8 PC DMS SET (7/8", 1-1/8", 1-3/8", 1-1/2", 2", 2-1/2", Pilot Drill, Hex Key) *8 PC CTH SET (5/8", 3/4", 7/8", 1", 1-1/4", 1-1/2", 1-3/4", 2", 2 Pilot Drills and Allen Keys) *8mm Pilot - CTH sizes 2-3/8"

ANNULAR CUTTERS

DWC Series - HSS Annular cutters

Designed for fast, efficient hole making. Universal cutters cut only that material necessary to produce a quality hole. Pilot pin included with each cutter. *Sets include sizes: 9/16", 11/16", 13/16", 15/16" and 1-1/16".

HSS nACo NANO-COMPOSITE COATED BLUE ANNULAR CUTTERS WITH PILOT PIN

ANC Series - nACo Annular Cutters

Drill America ANC Series Annular Cutters are for use with hard materials including steel, cast iron, heated and stainless steels. nACo Nano Coating permits better performance and longevity providing extra protection against oxidation, high heat and tool wear. This micro-thin coating helps keep the tool's sharpness, edge and lubricity. These cutters are made of M2 High Speed Steel, have a 3/4" Weldon Shank for use with most magnetic drill presses and come with a pilot pin. Sets include sizes: 9/16", 11/16", 13/16", 15/16" and 1-1/16".

HOLE SAWS

BI-METAL HOLE SAWS

DMS Series

Variable pitch teeth allow for cutting thru any wood, metal or plastic. Can be used in a wide variety of applications.

COUNTERBORES

DEWCBR Series - HSS

Counterboring is the enlargement of a portion of a hole that has previously been formed. If the counterbored portion is shallow (1/8" or less), the operation is usually known as spot-facing; for example, a flat seat for a bolt head or nut. If, on the other hand, the hole is enlarged to a considerable depth, it is designated as counterboring. These counterbores are made of two-piece construction, having an integral shank and counterbore-cutter, and a pilot that is interchangeable, which provides flexibility in the use of the tool.

HSS COUNTERSINKS

DEWSFC Series - Single Flute Countersinks

Single flute countersinks are ideal for chamfering, deburring, and countersinking. They provide a smooth finish on a variety of materials.

DEWCSK Series - 3 Flute Countersinks

3 - Flute center reamers are designed for countersinking holes for centers or to enlarge existing holes.

DEWMSK Series - 4 Flute Countersinks

4 - Flute countersinks or machine countersinks are designed for countersinking holes for centers or to enlarge existing holes.

DEWCHAT Series - 6 Flute Countersinks

6 - Flute or chatterless countersinks are designed to provide more metal removal than the 1, 2, 3, & 4 flute countersinks. They are also more effective on harder materials.

COUNTERSINKS

TSC Series - HSS

Countersink cutters may be used in all popular adjustable or micro-stop countersinking units utilizing a 1/4"–28 threaded shank drive. Made from the finest high speed tool steel. Precision ground to exacting tolerances and form relieved to insure concentricity of 100° countersink angle.

SCREW EXTRACTORS

DEWEZ Spiral Flute Screw Extractors

Screw extractors are used expressly for removing broken or seized screws

DEWEZSF Straight Flute Screw Extractors

Straight flute screw extractors are designed for removing broken material such as bolts and screws in softer materials. The straight flute will not enlarge material being removed.

THREADED SHANK DRILLS

TSD Series

Type "D" adapter drills are made from **M42 8% cobalt high speed steel** and are manufactured to NAS 965 Type "D" specifications with 135° heavy duty split point and surface treated for drilling hard, tough, high tensile strength materials. When drilling low tensile strength materials, the Type "D" cobalt drill will have significantly greater tool life than the NAS 965 Type "B", high speed steel adapter drill, resulting in a much lower cost per hole.

CHUCKING REAMERS

DWRR Series - HSS Straight Shank Straight Flute

DWRRSP Series - HSS Straight Shank Spiral Flute

Chuckling Reamers are designed for accurate reaming in most materials using all types of equipment including screw machines, turret lathes, drill presses, and machining centers. They are regularly pointed with a 45 chamfer. The straight-flute design is recommended for most general purpose reaming. The right-hand spiral-flute reamer has the smooth, chatter-free action necessary for fine finishes. It is recommended over the straight-flute for more difficult materials, better surface requirements, and applications with interruption such as a keyway or cross hole.

DWRRE Series - Straight Shank

DWRRETS Series - Taper Shank

An economical high production reamer. Expansion feature permits reamer to be resharpened many times to its original diameter therefore saving on replacement costs. These reamers are NOT for reaming oversized holes. They may be expanded only for the purpose of regrinding to the original size. Misuse of these tools may cause damage to the tool, the workpiece and injury to the operator.

REAMERS

H S S H A N D R E A M E R S

DWRRHD Series - Straight Flute

DWRRHDSP Series - Spiral Flute

Hand reamers are made of high-speed steel and are generally used by hand for the final sizing of holes. The square on the shank is suitable for holding in a tap wrench or a vise depending on whether the reamer or the part is rotated. A long starting taper is ground into the reamer for easy entry and accurate alignment. The straight-flute hand reamer is recommended for most hand reaming applications. The spiral-flute hand reamer is recommended for applications where there is an interrupted cut such as a keyway.

BRIDGE REAMERS

DWRRB Series - High Speed Spiral Flute Taper Shank

DWRRBST Series - High Speed Straight Flute Taper Shank

Designed for hard service, these reamers are especially suitable for use in structural iron or steel bridgework and ship construction in lining up bolt or rivet holes. They have a sharp point and long taper for easy entry in badly misaligned holes. The taper shank bridge reamer is commonly used in electric and pneumatic portable equipment.

N P T T A P E R P I P E R E A M E R S

Taper pipe reamers are made with a taper of 3/4" per foot and are designed for reaming holes to be tapped with American Standard taper pipe taps. Taper reamer use prior to tapping with taper pipe taps provides threads of better quality and are recommended when tapping Dryseal, NPT, and Military Aeronautical Pipe Thread Specification, ANPT. The spiral fluted reamers have left hand spiral. right hand cutting flutes.

TAPER PIN REAMERS

DWRRTP Series - Straight Flute

DWRRTPH Series - Helical Flute

DWRRTPS Series - Spiral Flute

These tapered reamers turn a straight hole into a tapered hole into which standard taper pins will fit. The straight-flute and spiral-flute reamers are generally used by hand while the helical-flute is designed for machine use. The square on the shanks of the straight and spiral fluted are suitable for holding in a tap wrench or vise. The straight flute taper pin reamer is recommended for most materials. The spiral flute taper pin reamer is recommended for applications where the reamer tends to wedge itself. The Helical-flute Taper pin reamer has the geometry for reaming holes for tapered pins with a machine. The free cutting action at high speeds produces a good finish and minimizes chip packing in the flutes.

HSS END MILLS

DWCT Series

These end mills are designed to machine most materials of medium hardness such as steel, brass, bronze and iron. The large core diameter provides rigidity and reduces deflection while the cutting geometry allows for rapid stock removal. They can be used for general-purpose milling including profiling and open-ended slots and keyways. They will plunge cut.

ALUMINUM OXIDE CLOTH ROLLS (HANDY ROLLS)

Handy Rolls, made of high grade, resin-bonded, J-wt. Cloth material, are packaged 50 Yards per Roll. The flexibility of these cloth rolls allows for contour work. They come packaged in storage containers for easy dispensing.

Rounded on one side, flat on the other. Used on concave and convex as well as flat surfaces. The backs of all Half Round Bastard Files are double cut. The Backs of all Half Round Second Cut Files longer than 6" are double cut, the 4" and 6" files are single cut. The backs of all Half Round Smooth files are single cut. The flat sides of all Half Files are double cut.

Three square Files are triangular in cross section, and are double cut and have fairly sharp corners that are slightly set and cut. These files are for general use by machinists for filing internal angles more than the right angle, for clearing out square corners and filing taps and cutters. Grading of cuts according to coarseness is same as Square File.
